DIAGNOSTICS = **STATS**

SIERRA TOUCH AND TEST SYSTEM

STATS™ (Sierra Touch And Test System) is an innovative new handheld engine diagnostic tool from Sierra. Now a marine technician can plug into a marine engine's Electronic Control Module (ECM) and diagnose engine problems without needing a laptop or PC. Techs will save time – and dealers will save money – moving directly to the job, with one quick and easy diagnostic tool that covers multiple engine manufacturers. Techs can even perform engine diagnostics while the boat is still in the water.

In addition, ECM diagnostic software and computer test systems have typically been available only to franchised or authorized dealers of each particular brand. With the STATS engine diagnostic tool, any dealer, franchised or independent, can now have access to this important service capability; creating opportunities to work on any of several popular engine brands.

USER FRIENDLY

Thanks to its intuitive user interface, technicians will find STATS easy to use. The lightweight console can be comfortably held in either hand, and the technician can navigate on-screen using clearly marked touch screen/function keys. Fault codes, live system tests and other service data is clearly readable on STATS' 6-inch monochrome screen, even in bright daylight. STATS can also clear codes once the problem has been remedied.

To purchase additional modules or to update existing software for free, dealers will simply plug the STATS console into their laptop using the included USB cable and follow installation instructions. The STATS tool is rugged, shock-resistant, and splash proof. It runs on 12V DC power (either from the engine power lead or using a power cable with battery clips) or 110V AC using the included AC adapter. New software modules are currently in development.

PROGRAMMABLE AND VERSATILE

Unlike those proprietary systems, the STATS console can be programmed to work with most major marine engines, outboard and PWC brands, including BRP®, Mercury/Mercruiser®, MEFI®,** Suzuki®, Yamaha® and Kawasaki®, SeaDoo® and Yamaha® personal watercraft. When dealers order their console, they specify which engine software/cable module(s) they want. Additional software modules can be downloaded from Sierra and installed at any time. Replacement cables are also available.

****NOTE:** MEFI® 1, 2, 3, & 4 will give you access to Volvo®, Indmar®, Crusader®, PCM® and Marine Power® engines that use MEFI® systems.

A NEW OPPORTUNITY FOR IMPROVED SERVICE

Now, independent and franchised dealers alike will be able to take advantage of the onboard diagnostic information on a wide range of popular engine brands with a handheld system, accurately diagnose problems and move quickly to make the right repair. A dedicated STATS support team is available to help dealers with technical questions.

ORDER INFORMATION

For the most complete coverage order 18-SD102. It includes the STATS console, dongle A (universal) and case, USB, power and master cables, neoprene branded cables/console cases, branded STATS carrying case, engine connection cables and software for Mercury/MerCruiser®, Yamaha®, Suzuki®, BRP® and MEFI® 1,2,3, & 4. Also includes printed instruction manual (available electronically).

Complete Kits	Part No.
Mercury/MerCruiser®/MEFI®, BRP®, Yamaha®, Suzuki® Diagnostic System	18-SD102
Mercury/MerCruiser®/MEFI®, BRP®, Yamaha® Diagnostic System	18-SD103
Mercury/MerCruiser®/MEFI®, BRP®, Suzuki® Diagnostic System	18-SD104
Mercury/MerCruiser®/MEFI®, Yamaha® Diagnostic System	18-SD105
Mercury/MerCruiser®/MEFI® Diagnostic System	18-SD106
BRP® Diagnostic System	18-SD107
Yamaha® Diagnostic System	18-SD108
Suzuki® Diagnostic System	18-SD109
SeaDoo®/Yamaha®/Kawasaki® Diagnostic System	18-SD110

FEATURES

- ECU Identification
- Reads Fault Codes
- Clears Fault Codes
- Displays Live Data
- Performs Engine Systems Tests
- Stationary Tests
- Service Info
- Vibration Proof
- Splash Proof
- Service Reset
- Component Actuation
- Internet Software Updates
- Print & Save Service Results
- USB, PC Interface
- Standard & Test Software
- Engine Hours
- Programs keys and remotes on systems that have this capability
